INSTALLING POWR2 IN YOUR PHONE OR TABLET

Checklist before you start, make sure that:

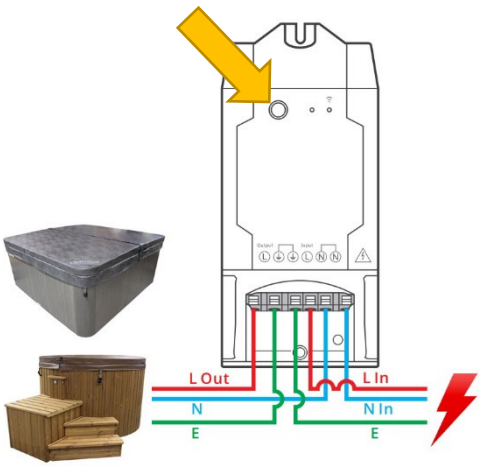
- Your smartphone or tablet is connected to a 2.4G Wi F in a network (eg 802.11ac or 802.11n standard) with internet access.
- A valid email address that you have access to
- You have the correct WiFi password
- Your phone or tablet has access to the App Store or Google Play Store
- POWR2 is connected to power and installed in your Spa

Usage without WiFi

The unit can be run manually without WiFi or eWeLink account. This is useful, for example, for checking function during installation. Start by briefly pressing the POWR2 button and when the red light comes on.

Install eWeLink

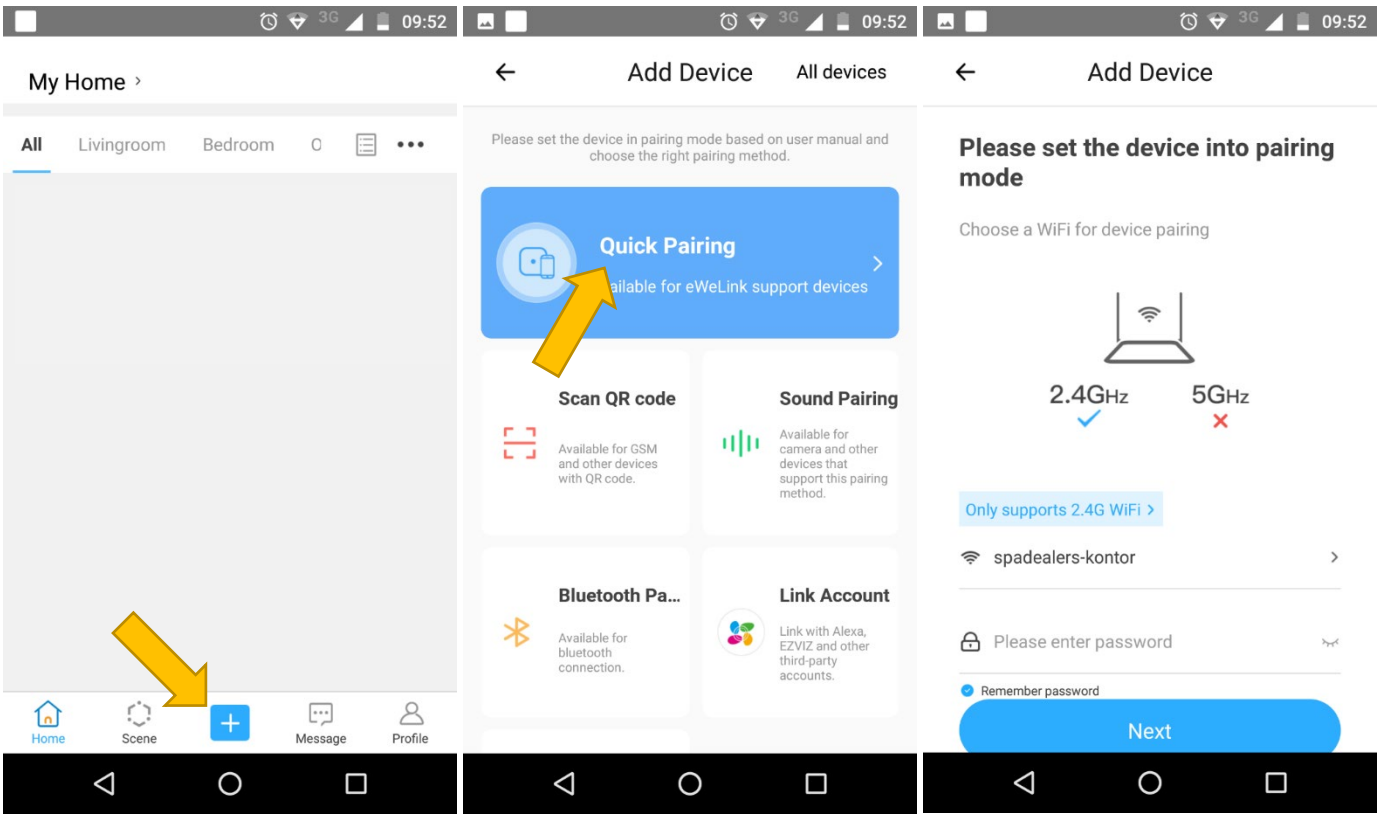
1. Go to the App Store or Google Play Store and download the app "eWeLink"
2. Create an account on eWeLink, follow the instructions there and log in.



Connect POWR2 to your EWeLink account

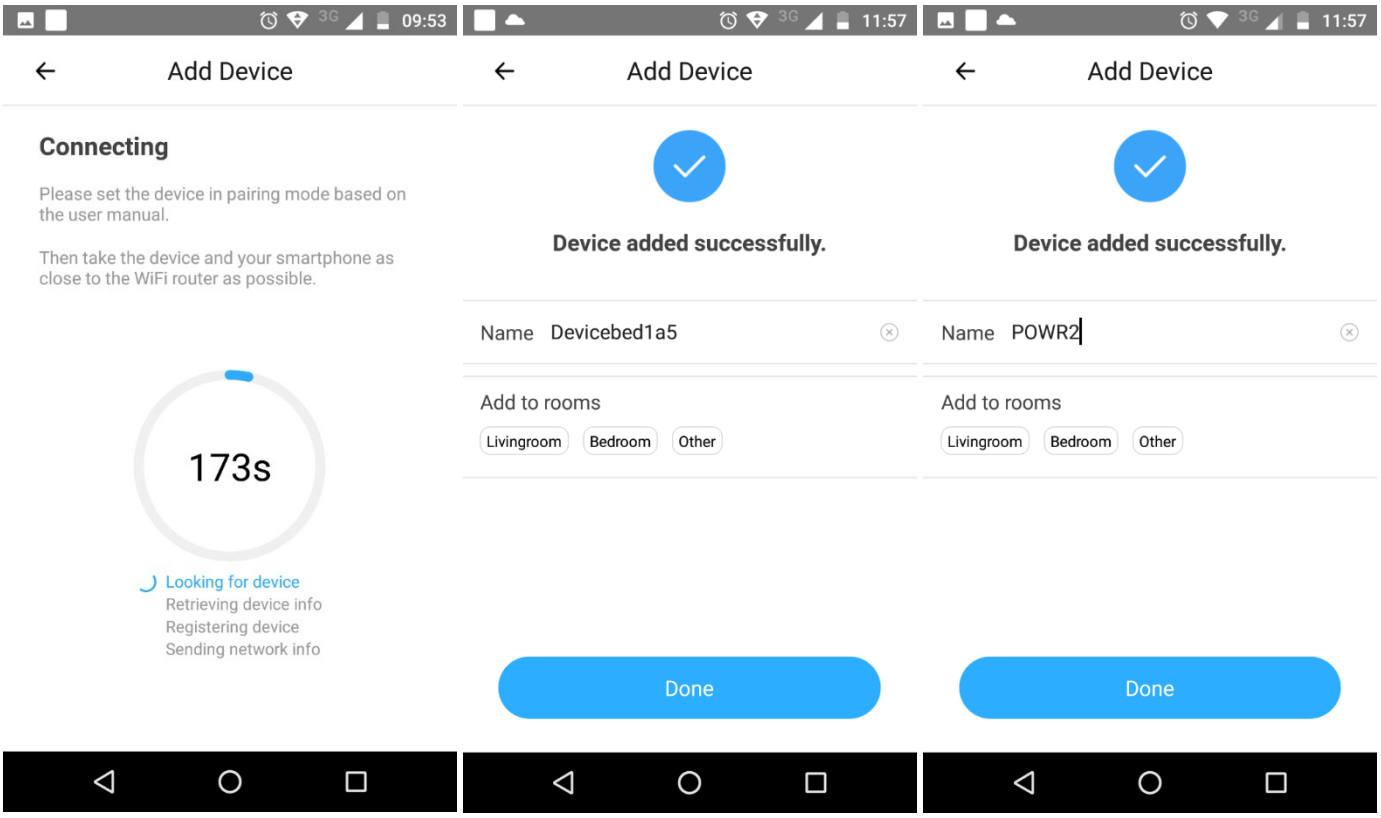
The blue light should illuminate indicating it has WiFi access on both devices. Start with installing the unit called POWR2 (energy, right)

Go to EWelink and press the **+** icon in the bottom of the screen. Hold down the white button on the device for about 7 seconds and the blue light flashes regularly. Select "Quick Pairing". Enter the password for your WiFi network. Click Next .



Wait while the device searches the network. You may need to repeat this process if it does not work the first time.

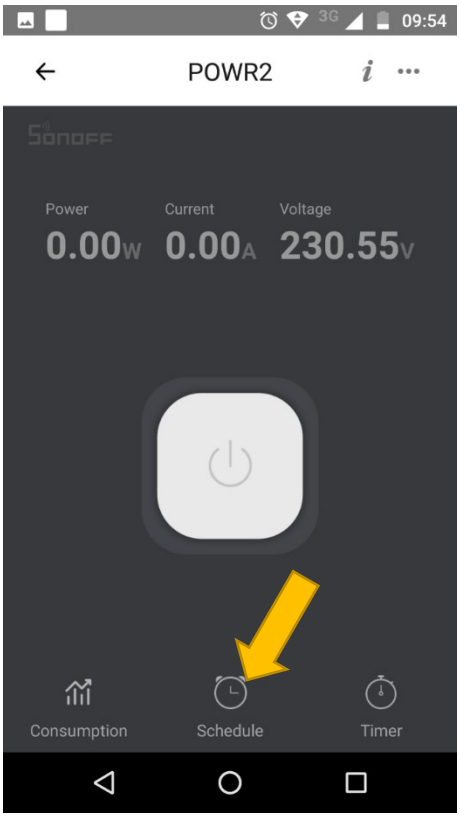
When your device is found, it's time to give it a name, here we call it POWR2.

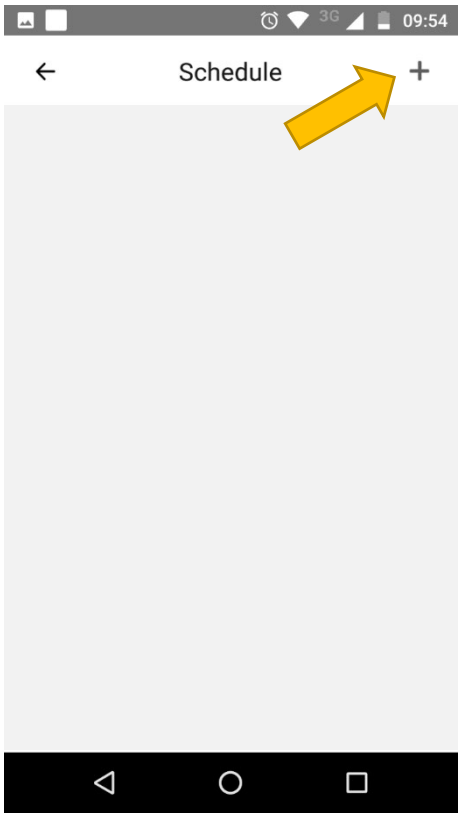


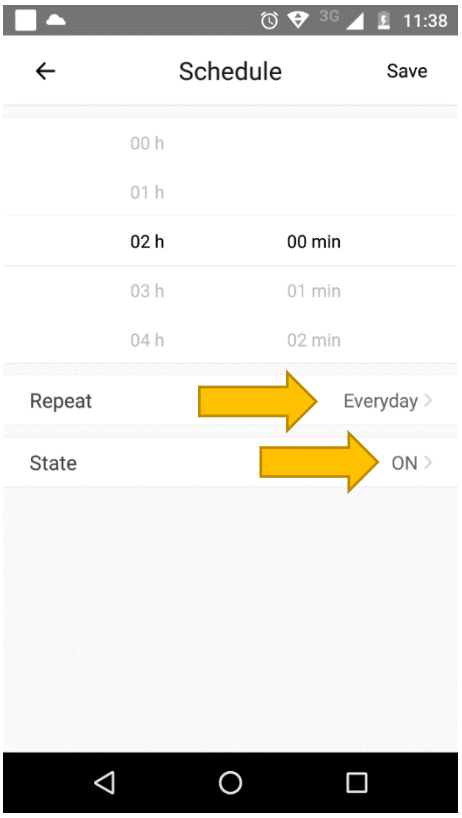
CONFIGURATION OF UNITS

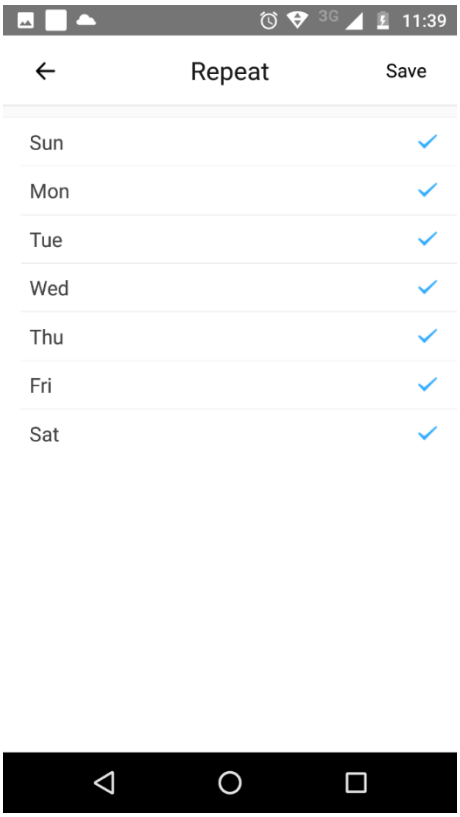
The next step is to configure **POWR2**. In this guide, we set the schedule to run according to the example in the XS user manual, 3 times a day at 2-hour intervals. **Note: If you have spot price electricity you can set the spa to instead run when its cheapest, for example: 02:00 – 05:00**

On 02:00 - Off 04:00 On 10:00 - Off 12:00 On 18:00 - Off 20:00







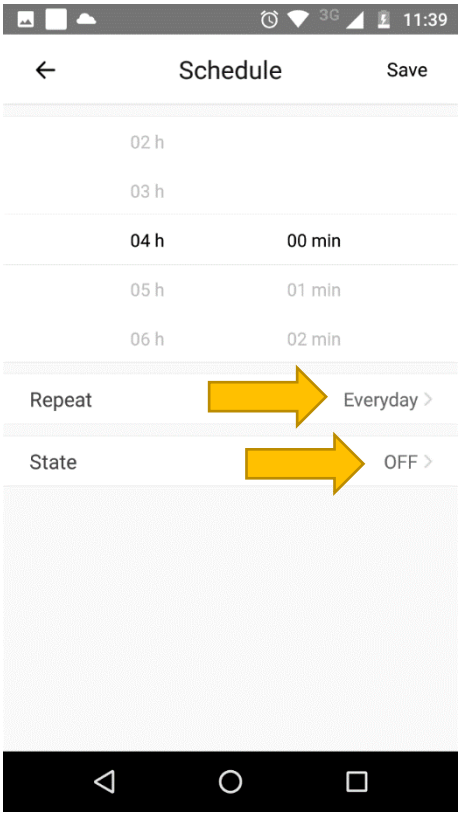


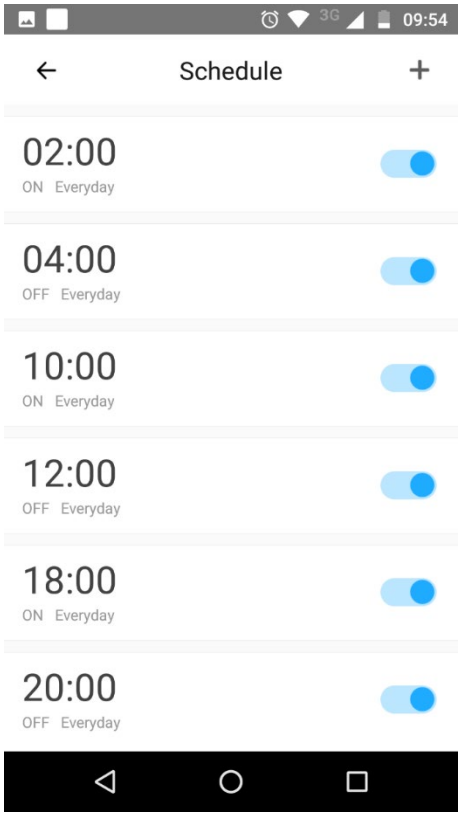
Click on **POWR2** to enter the device control page. Select schedule, at the bottom of the screen and click Add.

We start with the first intervals 02:00-04:00. Select the time 02:00 and State to ON. This means turning on at 2am.

Then click on Repeat and choose to repeat every day. Click OK and then Save.

ATTENTION! If you have spot price electricity, you set according to the cheapest time, e.g. 02:00 – 05:00.





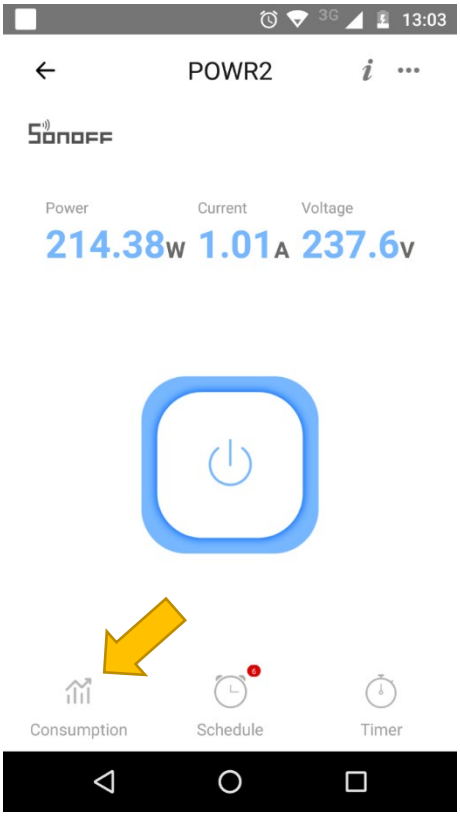
Now we enter the next time, 04:00 in the same way but this time we choose state to **OFF** .

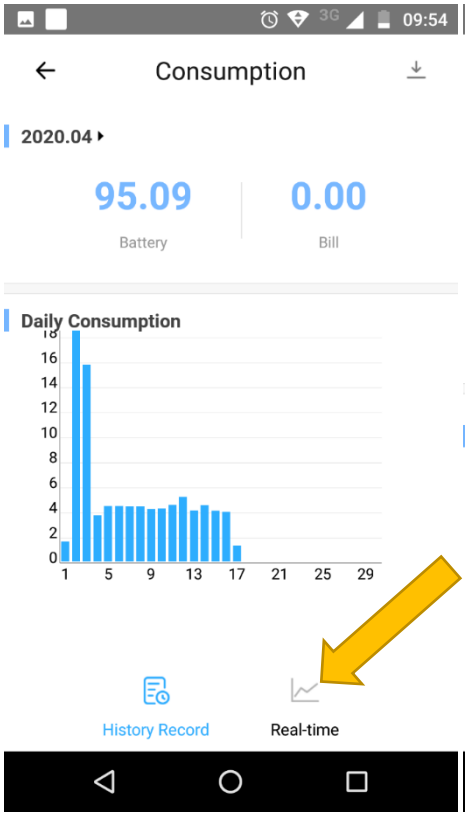
Now the pump starts between 02-04 every day.

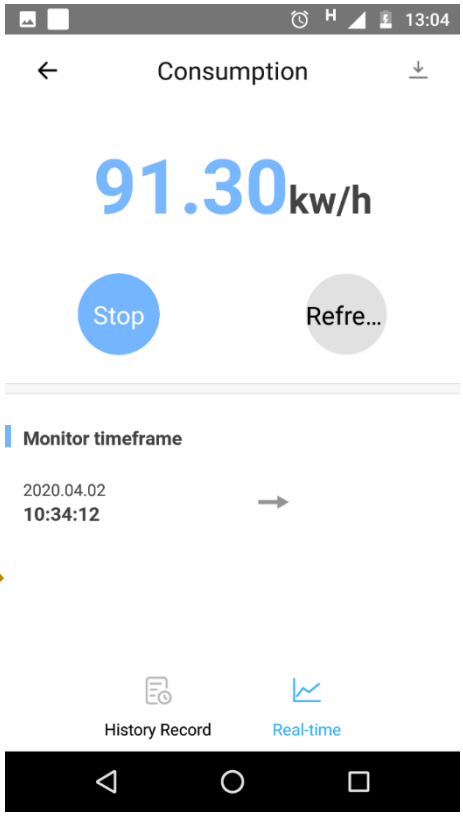
Repeat these steps for intervals 10-12 and 18-20. When you are done , the schedule should look like the image on the left .

The settings for the schedule are now ready

OTHER FEATURES IN POWR2

Electricity consumption, POWR2






By clicking on **Consumption** , you can see the electricity consumption over a longer period of time. Click **Real-time** and you can start logging how much electricity the spa consumes from that point onwards. **Note** ! If you press **Stop** and restart, the counter will be reset. **This still does not delete the overall statistics.**
